

Underutilised Post-harvest residues:

Post-harvest residues prior to clean-up (Richards Bay area):

In some instances small round-log poles may be collected for fencing or for use as firewood. In most cases however this is windrowed and burned to reduce the "Fire-hazard".

Windrowed, post-harvest residues, prior to being burned: Richards Bay area.

Post-harvest residues being bundled /Burning -off/ Sugar cane residues

Potential energy going to "Waste"!
